FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

June 16, 2000

Jane E. Jackson, Chief
Competitive Pricing Division
Common Carrier Bureau
Federal Communications Commission
445 12th Street, S. W.
Washington, D.C. 20554

Re: Transmittal of Telcordia Technologies' Consultant Report in support of July 1 Filing of Annual
       Access Charge Tariffs (DA 00-1269, CC Docket 94-1, CC Docket 96-45, CC Docket 96-262, CC
       Docket 99-249)

Dear Ms. Jackson:

Telcordia Technologies was retained by members of the CALLS coalition to perform two functions in
connection with their June 16 annual access charge filing: 1) to establish a method to assure that the
Incumbent Local Exchange Carriers subject to Price Cap regulation take at least $2.1 billion in reductions
in Carrier Common Line (CCL) and Average Traffic Sensitive (ATS) rates and 2) to calculate the average
price cap revenue reduction for all Price Cap ILECs and by each individual ILEC holding company, and to
determine which ILEC holding companies have reductions greater than average.   Results from the
Telcordia Report have been incorporated into the tariff transmittals filed by the CALLS participant carriers.

The attached Affidavit and accompanying report and spreadsheets explains the methodologies used by
Telcordia Technologies to obtain the results sought by the CALLS coalition.

Please associate the attached Affidavit, and accompanying Attachments with the public record in the
proceedings referenced above.

Please don't hesitate to call if you have any questions regarding the attached information

Sincerely,

Louise L. M. Tucker
Senior Counsel
Washington

AFFIDAVIT OF P. C. HUREWITZ

I, P. C. Hurewitz, being duly sworn, depose and say:

1. I am employed by Telcordia Technologies, at 3 Corporate Place, Piscataway, New Jersey, as

    Senior Consultant in the Rates and Tariffs Practice of the Business Optimization Services

    Unit. In this capacity, I have personal knowledge of the FCC Price Cap rules that apply to

Incumbent Local Exchange Carriers (ILECs) and of the FCC Order that implements portions of the Coalition for Affordable Local and Long Distance Services (CALLS) proposal.

2. I attended Clarkson University, graduating with a Bachelor of Science degree in Mathematics and a Bachelor of Science degree in Humanities in 1971. My initial employment was with AT&T Long Lines in 1972 in New York City, NY, in the Operations department of the New York City Area. While at Long Lines, I had other assignments in the Operations, Equipment Engineering, Cost Engineering, Accounts and Finance, and Service Costs departments.

3. I transferred to AT&T General Departments in1979, into the Regulatory Department, where I was responsible for the development of Exchange Access Measurement Studies, designed to measure usage on exchange lines leased by Interexchange Carriers from the Regional Bell Operating companies. That work led to assignments which involved the development of Access demand, rate, and cost methodologies which were used during the preparations for the AT&T divestiture in 1984, and which were the precursors to Access Pricing and (later) Price Cap rules.

4. I came to Bellcore (now Telcordia) upon divestiture of AT&T in 1984, and was involved in the original negotiations with AT&T to develop initial, post-divestiture, access rate levels. Since that time, I have continued to work on matters relating to Access services, including involvement in the development of the original Price Cap proposals. I now specialize in Price Cap issues, and have written (and had submitted to the FCC) proposed rewrites of the FCC's part 61 and 69 rules, in connection with both Biennial Reviews and proposed Price Cap

modifications. I have been personally responsible for the development of the Tariff Review Plans (TRPs) since 1993, and have provided them to both ILECs and the FCC. I have developed and taught training classes about Price Caps and TRPs to Telcordia clients and to new FCC staff members. I have been deeply involved in the development of the methods for Price Caps, and was personally involved in determining implementation techniques for the CALLS proposal, including presentations to FCC staff members and development of TRPs and other worksheets.

5. CALLS members have asked me to perform two functions in connection with the ILEC annual filing to be made on June 16, 2000, and to file the results of the analyses as part of the necessary support material required by the Commission's Price Cap CALLS Order[1] and 2000 Annual Access Filing Order[2],:

a. To establish a method to assure that $2.1Billion in reductions in Carrier Common Line (CCL) and Average Traffic Sensitive (ATS) rates are taken. This involved, among other things, development of a percentage up to which Local Switching revenues would have to be reduced by ILECs, and verification that total reductions at least equaled $2.1Billion.

---
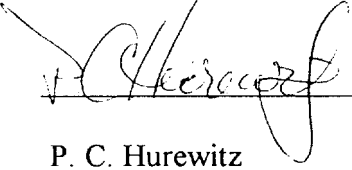

[1] In the Matter of Access Reform, Price Cap Performance Review for Local Exchange Carriers, Low-Volume Long Distance Users, Federal-State Joint Board on Universal Service, Sixth Report and Order in CC Docket Nos. 96-262 and 94-1. Report and Order in CC Docket 99-249. Eleventh Report and Order in CC Docket No. 96-45. Released May 31, 2000. ("CALLS" Order).
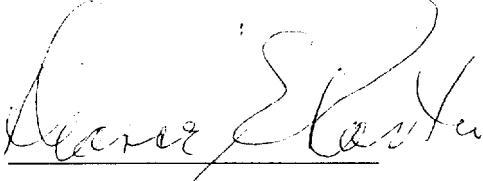

[2] Public Notice In the Matter of Material to be Filed in Support of 2000 Annual Access Tariff Filings, released June 9, 2000. The TRP format to be used by the ILECs in their filings was filed with the Commission in an Ex Parte Letter from John Nakahata, Counsel to the Coalition for Affordable Local and Long Distance Service, filed May 8, 2000, Re: Coalition for Affordable Local and Long Distance service Proposal--CC Dockets 96-262, 94-1, 96-45, 99-249.

b. To calculate the average price cap revenue reduction for all ILECs and for each individual ILEC holding company, and to determine which ILEC holding companies have reductions greater than average.

6. In order to accomplish this, I collected local switching and transport minutes of use and selected revenue and targeting data from each of the ILECs, and entered it into worksheets (developed by me with input and review by the industry team). Results were then transmitted back to members of the CALLS team. The procedures used to do this are described in Attachment A in more detail. The printouts of the spreadsheets that accomplished this are included as Attachment B. A copy of the disk containing the spreadsheets is also included.

7. The results of the functions performed in paragraph 5a above showed that the reduction percent for Local Switching was 31.55%, and that the sum of applicable revenue reductions was $2,100,635,131. The results of the functions performed in paragraph 5b above showed that average industry Price Cap revenue reduction prior to incorporating pooling was 9.9869%, and that SBC, U S WEST, Sprint, Frontier, and INS all had reductions at the holding company level that were greater than average.

Further, affiant sayeth not.

P. C. Hurewitz

Subscribed and sworn to me this 15 day of June, 2000

Notary Public

My Commission expires: _____

Methodology to develop allocation of mandated $2.1B reduction in "average traffic sensitive" (ATS) revenues:

A. Overview:

1. Incumbent Local Exchange Carriers (ILECs) participating in the Coalition for Affordable Local and Long Distance Services (CALLS) asked Telcordia:

   a. to collect selected information from the July 2000 Annual Access Service filing from all of the ILECs

   b. to determine the level of revenue reductions initially defined by those ILECs' rate-setting

   c. to calculate the additional level of reductions needed to meet the FCC's requirement for $2.1B in CALLS-related revenue reductions

   d. to determine the percentage decrease in Local Switching revenue required to generate the additional revenue reduction

   e. to calculate the average price cap revenue reduction for all ILECs and by individual ILEC holding company, and to determine which ILEC holding companies have reductions greater than average.

2. In order to accomplish these work items, three separate runs were required.

3. The objective of Run 1 was to develop an initial estimate of the percentage reduction in Local Switching revenues (above and beyond reductions achieved in USF removal, in Carrier Common Line (CCL) reductions, and in the targeting of GDPPI and X reductions to ATS

elements) required to achieve a total decrease in Carrier Common Line (CCL) and ATS revenues equal to $2.1Billion. ILECs did initial analyses to develop estimates of their targeting requirements, rate levels, and revenue levels, using the CALLS rules and the Tariff Review Plan formats. They provided selected information from those analyses to Telcordia, where it was used to calculate an initial estimate of the necessary reduction in Local Switching revenue. The result of that run was that a reduction of 31.78% of Local Switching revenue would generate a sufficient change in revenues to produce a total revenue reduction of $2.1B.

4. The output from Run 1 (the 31.78% reduction percent) was provided to the ILECs for their use in developing both a final allocation of targeting between the Switched Traffic Sensitive and the Trunking baskets, and a second, more accurate estimate of targeting requirements, rate levels, and revenue levels. Selected information from those analyses was again provided to Telcordia, where it was used in Run 2 to calculate a final Local Switching reduction percentage of 31.55%.

5. That percentage (31.55%) was disseminated to the ILECs for their use in creating final targeting amounts, rate levels, and revenue reductions. Finally, selected information from those last rate development analyses was sent to Telcordia so two things could be done:

   1) Telcordia could verify that at least $2.1B in CALLS-related revenue reductions had been made; and

   2) Telcordia could calculate the average Price Cap revenue reduction (prior to pooling) both for the total industry and for each ILEC holding company. An ILEC holding company

whose percent reduction in total Price Cap revenues (before incorporating the impact of pooling) was greater than the average industry reduction was eligible for pooling, as specified in the FCC's rules, part 61.48(m)(1)(i).

B. Detailed description of process to develop the Local Switching (LS) reduction percent.

6. By CALLS ILEC jurisdiction, Telcordia collected information from initial runs of the ILECs Tariff Review Plans (TRPs).

   a. Demand values for both Local Switching and LEC Transport minutes of use

   b. ATS target levels

   c. CCL and ATS revenue reductions associated .with the removal of Universal Service Fund (USF) from existing Price Cap rates

   d. Revenues for current LS ATS elements, other Switching ATS elements, and Transport ATS elements

   e. The amount of revenue reduction available due to the impact of productivity and inflation, using the formulas contained in part 61.45 of the FCC's rules.

   f. Revenue reductions from the TRP which displayed the removal of Universal Service Fund (USF) elements from Price Cap rate elements

   g. Revenue reductions within the CALLS TRP for Carrier Common Line (CCL) elements

7. By ILEC jurisdiction, calculated the current ATS revenues, as well as the average rate levels associated with Traffic Sensitive Switched services, Transport services, and total ATS services.

8. By ILEC jurisdiction, calculated the minimum and maximum amounts remaining to reach the ATS floor, and determined whether reductions in rates associated with the productivity and inflation reductions were sufficient to bring the jurisdiction's ATS rate down to its target level.

9. By ILEC jurisdiction, calculated the percentage reduction in LS revenues needed to bring the ATS rate down to its target level.

10. Determined the maximum level of reduction each jurisdiction would incur due by calculating the minimum of either:

    a. the dollars required to take the ATS rate down to the target rate for that jurisdiction; or

    b. the dollars associated with taking reductions associated with USF, CCL, and a percentage of Local Switching. For this initial run, the percentage of LS was calculated to be 31.78%.

11. This percentage was provided to the ILECs for their use in creating a second set of TRPs, etc., and data out of those TRPs (similar to the data collected in step 6) were again provided to Telcordia.

12. Repeated steps 7 through 10, to develop a revised Local Switching percent reduction of 31.55%, using the updated results provided by the ILECs.

13. This final LS reduction percentage was provided to the ILECs for their use in developing final rates and revenues, prior to the incorporation of pooling.

14. ILECs developed their final rates, revenues, and price cap indices, and completed their TRPs by jurisdiction. Out of those runs, they provided Telcordia with total USF removal, CCL, and ATS-related revenue reductions. Telcordia summed those values, and determined that the industry had taken a total of $2,100,635,131 in reductions, which exceeded the $2.1B requirement by $635,131.

C. **Detailed description of process to calculate average Price Cap revenue reduction (prior to pooling) for the total industry and for each ILEC holding company**

15. Along with the data collected in step B14 (above), Telcordia collected revenue values for three separate items:

    a. Total Price Cap revenues out of the CALLS TRP filing prior to incorporating the impact of pooling (calculated by pricing out 1999 demand at the rates proposed to go into effect with the CALLS filing)

b. Total Price Cap "revenues" going into the USF removal filing (calculated by pricing out 1999 demand at the rates in effect at the time the USF removal filing would be made)

c. USAC receipts that will be collected.

16. Since the intent of this run was to develop the average reduction in Price Cap revenues, and the rates used in step 15b included USF receipts, it was necessary to remove them (or a valid proxy for them) from any comparisons made. Therefore, a calculation was made to create Total Price Cap "revenues" going into the USF removal filing excluding USF receipts by subtracting 15c from 15b.

17. The percent change in revenues was then developed for each jurisdiction by dividing the revenues from step 15a by the revenues from step 16.

18. An ILEC holding company percent change was calculated by summing the step 15a revenues from all of its jurisdictions, and dividing by the sum of the jurisdictions' step 16 revenues.

19. The total price cap ILEC industry percent change was calculated by summing the step 15a revenues from all of the jurisdictions, and dividing by the sum of all jurisdictions' step 16 revenues.

20. The percent change calculations (prior to pooling) for the price cap ILEC industry and for individual holding companies are as follows:

- ° Industry: - 9.9869%

- ° Bell Atlantic: - 9.5308%

- ° BellSouth: - 9.7831%

- ° SBC: -11.1206%

- ° U S WEST: -10.1613%

- ° GTE: - 7.8322%

- ° Sprint: -10.9946%

- ° Frontier: -11.8462%

- ° Cincinnati: - 7.9263%

- ° Citizens: - 9.3133%

- ° Valor: - 7.0015%

- ° Alltel (Aliant):   - 1.9328%

- ° INS: -10.2232%
